$\qquad$

## Basics of Probability

Probability, at its most basic level, is the ratio of what you want to the total number of options.
Event: a possible outcome
Complement of an Event: when an event DOES NOT happen
Sample Space: the list of all possible outcomes
Sample Size: the total number of outcomes
Uniform Probability: when all outcomes have the same probability of happening
Non-uniform Probability: when one or more of the outcomes has a different probability than the others
Fill in the table for each.

## EXAMPLE

| Sample Space (List of item types) | White Shirt | Black Shirt | Blue Shirt |
| :--- | :---: | :---: | :---: |
| Amount of that item | 2 | 2 | 1 |
| Sample Size (total: same number for each) | 5 total | 5 total | 5 total |
| Probability of that item (as a reduced fraction) | $\frac{2}{5}$ | $\frac{2}{5}$ | $\frac{1}{5}$ |
| Probability of the complement (NOT that item) | $\frac{\text { not white }}{5}=\frac{3}{5}$ | $\frac{\text { not black }}{5}=\frac{3}{5}$ | $\frac{\text { not blue }}{5}=\frac{4}{5}$ |

Does this sample space have a Uniform or Non-uniform probability?
It is non-uniform, because the blue shirts have a different probability than the white and black shirts.
EXAMPLE There are 7 blue pens, 5 red pens, 10 black pens, and 4 pencils in a box.

| Sample Space | Blue Pen | Red Pen | Black Pen | Pencil |
| :--- | :---: | :---: | :---: | :---: |
| Amount of that item | 7 | 5 | 10 | 4 |
| Sample Size | 26 | 26 | 26 | 26 |
| Probability of that item | $\frac{7}{26}$ | $\frac{5}{26}$ | $\frac{10 \div 2}{26 \div 2}=\frac{5}{13}$ | $\frac{4 \div 2}{26 \div 2}=\frac{2}{13}$ |
| Probability of the <br> complement | $\frac{\text { not blue pen }}{26}=\frac{19}{26}$ | $\frac{\text { not red pen }}{26}=\frac{21}{26}$ | $\frac{\text { not black pen }}{26}=\frac{16}{26}$ | $\frac{\text { not pencil }}{26}=\frac{22}{26}$ |

Does this sample space have a Uniform or Non-uniform probability?
It is non-uniform, because none of them have the same probability.
1.

| Sample Space |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Amount of that item |  |  |  |  |
| Sample Size |  |  |  |  |
| Probability of that item |  |  |  |  |
| Probability of the <br> complement |  |  |  |  |

Does this sample space have a Uniform or Non-uniform probability?
2. There are 8 clear marbles, 5 red marbles, and 8 yellow marbles in a bag.

| Sample Space |  |  |  |
| :--- | :--- | :--- | :--- |
| Amount of that item |  |  |  |
| Sample Size |  |  |  |
| Probability of that item |  |  |  |
| Probability of the <br> complement |  |  |  |

Does this sample space have a Uniform or Non-uniform probability?
3.

| Sample Space |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Amount of that item |  |  |  |  |
| Sample Size |  |  |  |  |
| Probability of that item |  |  |  |  |
| Probability of the <br> complement |  |  |  |  |

Does this sample space have a Uniform or Non-uniform probability?
4. There are 2 yellow balloons, 2 green balloons, 4 blue balloons, 2 white balloons, and 4 orange balloons.

| Sample Space |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Amount of that item |  |  |  |  |  |
| Sample Size |  |  |  |  |  |
| Probability of that item |  |  |  |  |  |
| Probability of the <br> complement |  |  |  |  |  |

Does this sample space have a Uniform or Non-uniform probability?
5. Spinner has 8 sections: 2 of them are red, 2 are blue, 2 are green, and the rest are white.

| Sample Space |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Amount of that item |  |  |  |  |
| Sample Size |  |  |  |  |
| Probability of that item |  |  |  |  |
| Probability of the <br> complement |  |  |  |  |

Does this sample space have a Uniform or Non-uniform probability?
