

## Integrated II: Unit 1 Study Guide

1. Simplify. $(5x^2 - x + 8) + (-9x - 13)$	2. Simplify. $(-2x^2 + 7x - 4) + (8x^2 - 6)$	3. Simplify. $(6x^2 - 5x - 3) + (2x - 5)$																																				
4. Simplify. $(6x^5 - 2x^2) - (4x^3 + 5x^2 - 9)$	5. Simplify. $(3x^4 + 5x^3) - (8x^3 + 6x^2 - 7)$	6. Simplify. $(-2x^2 - x) - (6x^3 + 2x^2 - 4x)$																																				
7. Determine the product. $(x - 8)(6x + 5)$	8. Determine the product. $(2x - 7)(x - 4)$	9. Determine the product. $(x + 12)(3x - 2)$																																				
10. Factor completely. $x^2 + 6x + 8$	11. Factor completely. $x^2 - 13x + 40$	12. Factor completely. $x^2 - 7x - 18$																																				
13. Factor completely. $x^2 - 36$	14. Factor completely. $x^2 - 25$	15. Factor completely. $9x^2 - 4$																																				
16. Factor completely. $20x^2 - 45$	17. Factor completely. $24x^2 - 54$	18. Factor completely. $48x^2 - 75$																																				
19. Determine if the relation below is linear or quadratic. <table border="1" data-bbox="142 1688 358 1885"> <thead> <tr> <th><math>x</math></th> <th><math>y</math></th> </tr> </thead> <tbody> <tr> <td>1</td> <td>6</td> </tr> <tr> <td>2</td> <td>-2</td> </tr> <tr> <td>3</td> <td>-3</td> </tr> <tr> <td>4</td> <td>3</td> </tr> <tr> <td>5</td> <td>16</td> </tr> </tbody> </table>	$x$	$y$	1	6	2	-2	3	-3	4	3	5	16	20. Determine if the relation below is linear or quadratic. <table border="1" data-bbox="597 1688 813 1885"> <thead> <tr> <th><math>x</math></th> <th><math>y</math></th> </tr> </thead> <tbody> <tr> <td>1</td> <td>-2</td> </tr> <tr> <td>2</td> <td>2</td> </tr> <tr> <td>3</td> <td>6</td> </tr> <tr> <td>4</td> <td>10</td> </tr> <tr> <td>5</td> <td>14</td> </tr> </tbody> </table>	$x$	$y$	1	-2	2	2	3	6	4	10	5	14	21. Determine if the relation below is linear or quadratic. <table border="1" data-bbox="1052 1688 1268 1885"> <thead> <tr> <th><math>x</math></th> <th><math>y</math></th> </tr> </thead> <tbody> <tr> <td>1</td> <td>8.5</td> </tr> <tr> <td>2</td> <td>7</td> </tr> <tr> <td>3</td> <td>5.5</td> </tr> <tr> <td>4</td> <td>4</td> </tr> <tr> <td>5</td> <td>2.5</td> </tr> </tbody> </table>	$x$	$y$	1	8.5	2	7	3	5.5	4	4	5	2.5

22. The graph of a quadratic function is shown below. Identify each property listed.

Domain: \_\_\_\_\_  
 Range: \_\_\_\_\_  
 Zeros: \_\_\_\_\_  
 Interval of Increase: \_\_\_\_\_  
 Interval of Decrease: \_\_\_\_\_  
 x-intercept: \_\_\_\_\_  
 y-intercept: \_\_\_\_\_

23. The graph of a quadratic function is shown below. Identify each property listed.

Domain: \_\_\_\_\_  
 Range: \_\_\_\_\_  
 Zeros: \_\_\_\_\_  
 Interval of Increase: \_\_\_\_\_  
 Interval of Decrease: \_\_\_\_\_  
 x-intercept: \_\_\_\_\_  
 y-intercept: \_\_\_\_\_

24. The graph of a quadratic function is shown below. Identify each property listed.

Domain: \_\_\_\_\_  
 Range: \_\_\_\_\_  
 Zeros: \_\_\_\_\_  
 Interval of Increase: \_\_\_\_\_  
 Interval of Decrease: \_\_\_\_\_  
 x-intercept: \_\_\_\_\_  
 y-intercept: \_\_\_\_\_

25. Find the roots of the quadratic function below.

$$f(x) = (x + 9)(x - 4)$$

26. Find the roots of the quadratic function below.

$$f(x) = -(x - 6)(x + 2)$$

27. Find the roots of the quadratic function below.

$$f(x) = (x)(x + 7)$$

28. Write the function below in factored form; then find the roots.  $f(x) = 5x^2 - 8x + 3$

29. Write the function below in factored form; then find the roots.  $f(x) = 2x^2 + 13x + 21$

30. Write the function below in factored form; then find the roots.  $f(x) = 4x^2 - 21x + 5$

31. Consider the function shown below.

$$f(x) = x^2 + 2x - 8$$

A) Find the vertex

B) Is it an absolute maximum or minimum? Justify your answer.

32. Consider the function shown below.

$$f(x) = x^2 + 6x + 3$$

A) Find the vertex

B) Is it an absolute maximum or minimum? Justify your answer.

33. Consider the function shown below.

$$f(x) = x^2 + 10x - 2$$

A) Find the vertex

B) Is it an absolute maximum or minimum? Justify your answer.

34. Graph the following quadratic function.

$$f(x) = (x + 2)^2 - 4$$

35. Graph the following quadratic function.

$$f(x) = -(x - 3)^2 + 4$$

36. Graph the following quadratic function.

$$f(x) = (x + 5)^2 + 9$$

37. In the game Happy Acres, crops are planted for harvest. As players level up, the amount of time it takes for plants to be ready increases. On the first level, a plant takes 6 minutes. The second level takes 9 minutes, the third level 14 minutes, the fourth level 21 minutes and so on and so forth.

- A) Make a table that lists the level and the total minutes it takes.
- B) What type of function can model this situation? Explain how you can identify the function type.
- C) Write an equation that models the situation.

38. Stacy is selling lemonade. Her parents gave her \$3.00 to start the day. Each cup she sells makes her \$0.50. On the first cup, her total profit is \$3.50. On the second cup, it's \$4.00; the third is \$4.50, the fourth \$5.00, and so on and so forth.

- A) Make a table that lists the number of cups sold and the total profit Stacy makes.
- B) What type of function can model this situation? Explain how you can identify the function type.
- A) Write an equation that models the situation.

39. A snail moves at a steady pace of 3 feet every minute. In one minute, it moves 3 feet. In two minutes, it moves 6 ft, three minutes is 9 ft, four is 12 ft, and so on and so forth.

- A) Make a table that lists the number of minutes and the total feet it moves.
- B) What type of function can model this situation? Explain how you can identify the function type.
- A) Write an equation that models the situation.
