

Features of a Parabola (Quadratic Function)

	Definition	Written as...
Domain	All values of x that are possible on the graph.	(or [lowest x, highest x] or) (&) mean "not equal" [&] mean "equal"
Range	All values of y that are possible on the graph.	(or [lowest value, highest value] or) (&) mean "not equal" [&] mean "equal"
Interval of Increase	All values of x where the graph is rising from left to right.	(or [lowest x, highest x] or) (&) mean "not equal" [&] mean "equal"
Interval of Decrease	All values of x where the graph is falling from left to right.	(or [lowest x, highest x] or) (&) mean "not equal" [&] mean "equal"
Zeros	Zeros <u>are</u> x-intercepts	(x-value, 0) & (x-value, 0)
x-intercept	The point(s) where the graph crosses the x-axis (y = 0) .	<i>There could be zero, one, or two of these points.</i>
y-intercept	The point(s) where the graph crosses the y-axis (x = 0) .	(0, y-value)

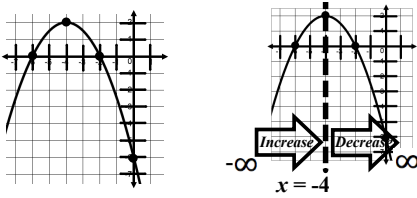

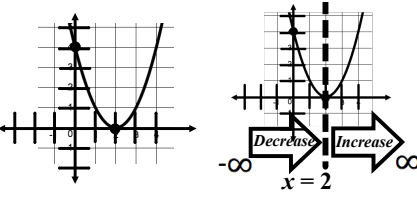

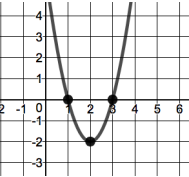

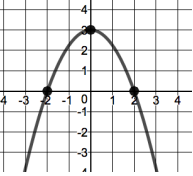

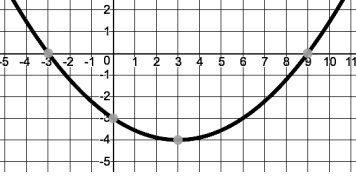

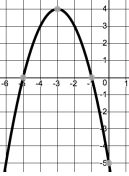

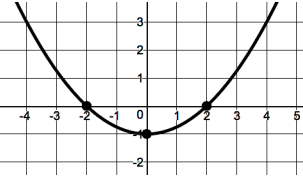

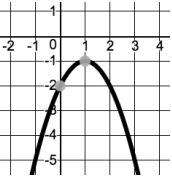

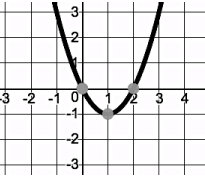

Domain & Range

Domain is what x can be, and Range is what y can be. They are only limited if the graph stops or turns around.

<p>EXAMPLE</p>  <p>Domain: $(-\infty, \infty)$ Range: $(-\infty, 2]$ <i>The 2 is part of the range, so]</i></p>	<p>EXAMPLE</p>  <p>Domain: $(-\infty, \infty)$ Range: $[0, \infty)$ <i>The 0 is part of the range, so [</i></p>	<p>1.</p>  <p>Domain: _____ Range: _____</p>
<p>2.</p>  <p>Domain: _____ Range: _____</p>	<p>3.</p>  <p>Domain: _____ Range: _____</p>	<p>4.</p>  <p>Domain: _____ Range: _____</p>
<p>5.</p>  <p>Domain: _____ Range: _____</p>	<p>6.</p>  <p>Domain: _____ Range: _____</p>	<p>7.</p>  <p>Domain: _____ Range: _____</p>

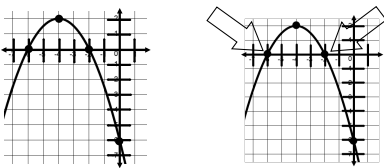

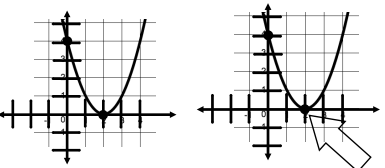

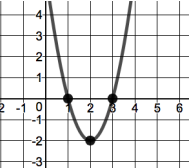

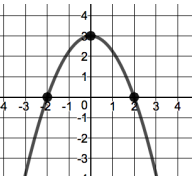

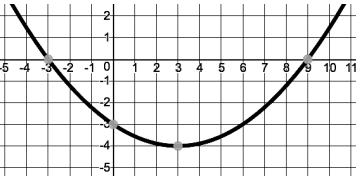

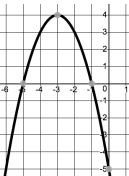

Intervals of Increase & Decrease

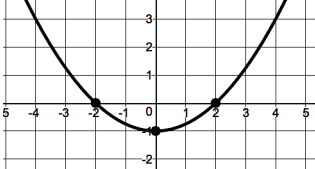

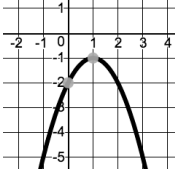

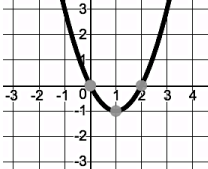

The intervals are the values of x where the parabola either rises (increase) or falls (decreases). The axis of symmetry (x -value of the vertex) is the turning point and is not part of the increase or the decrease, so we'll use () not [].

<p>EXAMPLE</p>  <p>Interval of Increase: $(-\infty, -4)$ Interval of Decrease: $(-4, \infty)$ <i>-4 is the turning point—it's not increase or decrease—, so use ()</i></p>	<p>EXAMPLE</p>  <p>Interval of Increase: $(2, \infty)$ Interval of Decrease: $(-\infty, 2)$ <i>2 is the turning point—it's not increase or decrease—, so use ()</i></p>	<p>8.</p>  <p>Interval of Increase: _____ Interval of Decrease: _____</p>
<p>9.</p>  <p>Interval of Increase: _____ Interval of Decrease: _____</p>	<p>10.</p>  <p>Interval of Increase: _____ Interval of Decrease: _____</p>	<p>11.</p>  <p>Interval of Increase: _____ Interval of Decrease: _____</p>
<p>12.</p>  <p>Interval of Increase: _____ Interval of Decrease: _____</p>	<p>13.</p>  <p>Interval of Increase: _____ Interval of Decrease: _____</p>	<p>14.</p>  <p>Interval of Increase: _____ Interval of Decrease: _____</p>

Zeros & X-Intercepts

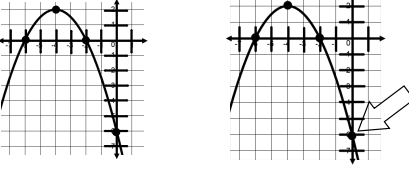

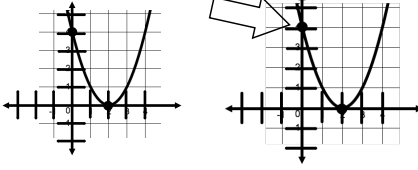

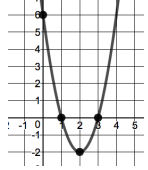

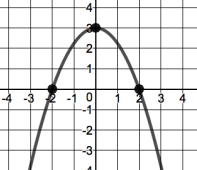

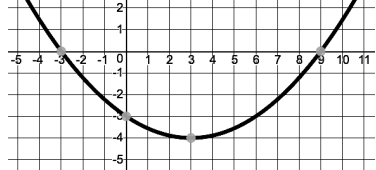

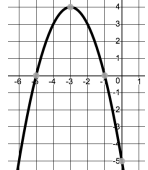

The zeros/ x -intercepts are the points where the parabola crosses the x -axis. The points will look like: $(_, 0)$.

<p>EXAMPLE</p>  <p>Zeros: $(-6, 0)$ & $(-2, 0)$ x-intercept: $(-6, 0)$ & $(-2, 0)$</p>	<p>EXAMPLE</p>  <p>Zeros: $(2, 0)$ x-intercept: $(2, 0)$</p>	<p>15.</p>  <p>Zeros: _____ x-intercept: _____</p>
<p>16.</p>  <p>Zeros: _____ x-intercept: _____</p>	<p>17.</p>  <p>Zeros: _____ x-intercept: _____</p>	<p>18.</p>  <p>Zeros: _____ x-intercept: _____</p>

<p>19.</p>  <p>Zeros: _____ x-intercept: _____</p>	<p>20.</p>  <p>Zeros: _____ x-intercept: _____</p>	<p>21.</p>  <p>Zeros: _____ x-intercept: _____</p>
---	---	---

Y-intercept

The Y-intercept is the point where the parabola crosses the y-axis. The point will look like: (0, ___).

<p>EXAMPLE</p>  <p>y-intercept: (0, -6)</p>	<p>EXAMPLE</p>  <p>y-intercept: (0, 4)</p>	<p>22.</p>  <p>y-intercept: _____</p>
<p>23.</p>  <p>y-intercept: _____</p>	<p>24.</p>  <p>y-intercept: _____</p>	<p>25.</p>  <p>y-intercept: _____</p>

When you're done solving the problems on this handout, make sure you check your answers against the **correct answers below**.

1. Domain: $(-\infty, \infty)$ Range: $[-2, \infty)$	2. Domain: $(-\infty, \infty)$ Range: $(-\infty, 3]$	3. Domain: $(-\infty, \infty)$ Range: $[-4, \infty)$
4. Domain: $(-\infty, \infty)$ Range: $(-\infty, 4]$	5. Domain: $(-\infty, \infty)$ Range: $[-1, \infty)$	6. Domain: $(-\infty, \infty)$ Range: $(-\infty, -1]$
7. Domain: $(-\infty, \infty)$ Range: $[-1, \infty)$	8. Interval: $(2, \infty)$ Decrease: $(-\infty, 2)$	9. Interval: $(-\infty, 0)$ Decrease: $(0, \infty)$
10. Interval: $(3, \infty)$ Decrease: $(-\infty, 3)$	11. Interval: $(-\infty, -3)$ Decrease: $(-3, \infty)$	12. Interval: $(0, \infty)$ Decrease: $(-\infty, 0)$
13. Interval: $(-\infty, 1)$ Decrease: $(1, \infty)$	14. Interval: $(1, \infty)$ Decrease: $(-\infty, 1)$	15. Zeros: $(1, 0)$ & $(3, 0)$ x-intercept: $(1, 0)$ & $(3, 0)$
16. Zeros: $(-2, 0)$ & $(2, 0)$ x-intercept: $(-2, 0)$ & $(2, 0)$	17. Zeros: $(-3, 0)$ & $(9, 0)$ x-intercept: $(-3, 0)$ & $(9, 0)$	18. Zeros: $(-5, 0)$ & $(-1, 0)$ x-intercept: $(-5, 0)$ & $(-1, 0)$
19. Zeros: $(-2, 0)$ & $(2, 0)$ x-intercept: $(-2, 0)$ & $(2, 0)$	20. Zeros: There are none. x-intercept: There are none.	21. Zeros: $(0, 0)$ & $(2, 0)$ x-intercept: $(0, 0)$ & $(2, 0)$
22. y-intercept: $(0, 6)$	23. y-intercept: $(0, 3)$	24. y-intercept: $(0, -3)$
25. y-intercept: $(0, -5)$		

Linear vs. Quadratic & Writing Equations from Tables

Determining if a function is linear or quadratic from a table:

If the first differences are the same, then it is linear. If the second differences are the same, then it's quadratic.

For each table, use the word bank to fill in the blanks.

The function is _____ because it has a _____ that is _____.

Possible responses are:	Linear or Quadratic	1 st difference or 2 nd difference	constant
-------------------------	---------------------	--	----------

Writing the Equation from a Table

A linear equation uses the formula $f(x) = mx + b$, so you need to find m & b .

A quadratic equation uses the formula $f(x) = ax^2 + bx + c$, so you need to find a , b , & c .

Steps for writing the Linear equation...	Linear Example																														
<p>Step 1: Find the 1st differences.</p>	<table style="display: inline-table; vertical-align: middle;"> <tr><td>x</td><td>y</td></tr> <tr><td>1</td><td>7</td></tr> <tr><td>2</td><td>4</td></tr> <tr><td>3</td><td>1</td></tr> <tr><td>4</td><td>-2</td></tr> <tr><td>5</td><td>-5</td></tr> </table> <div style="display: inline-block; vertical-align: middle; text-align: center; margin: 0 10px;"> ↑ That gives us this ↓ </div> <table style="display: inline-table; vertical-align: middle;"> <tr><td>x</td><td>y</td><td>1st</td></tr> <tr><td>1</td><td>7</td><td>-3</td></tr> <tr><td>2</td><td>4</td><td>-3</td></tr> <tr><td>3</td><td>1</td><td>-3</td></tr> <tr><td>4</td><td>-2</td><td>-3</td></tr> <tr><td>5</td><td>-5</td><td>-3</td></tr> </table>	x	y	1	7	2	4	3	1	4	-2	5	-5	x	y	1 st	1	7	-3	2	4	-3	3	1	-3	4	-2	-3	5	-5	-3
